to the god of day, proceeds to the tu-el or yard, in which the cattle have been confined, and, again addressing the sun as the emblem of Siva, asks his blessing,
(233) and liberates the herd. He allows the cattle to stray about in the neighbourhood of the village, on a piece of ground which is always kept for this purpose, and, having performed his morning ablutions, commences the milking. This is also preceded by further salutations and praises to the sun. On entering the house in the evening, the Burgher addresses the lamp, now the only light, or visible emblem of the deity. 'Thou, creator of this and of all worlds, the greatest of the great, who art with us, as well in the mountain as in the wilderness, who keepeth the wreaths that adorn the head from fading, who guardeth the foot from the thorn, God, among a hundred, may we be prosperous.'"

The Badaga understands the rotation of crops well. On his land he cultivates bearded wheat (beer ganji), barley, onions, garlic, potatoes, kīrē (*Amarantus*), sāmai (*Panicum miliare*), tenai (*Setaria italica*), etc.

562
"Among the Badagas," Mr. Natesa Sastri writes, "the position of the women is somewhat different from
(462) what it is among most peoples. Every Badaga has a few acres to cultivate, but he does not mainly occupy himself with them, for his wife does all the out-door farm work, while he is engaged otherwise in earning something in hard cash. To a Badaga, therefore, his
(465) wife is his capital. Her labour in the field is considered to be worth one rupee per day, while an average male
(464) Badaga earns merely three annas. A Badaga woman, who has not her own acres to cultivate, finds work on
(262) some other lands. She thus works hard for her husband and family, and is quite content with the coarsest food—the korali (*Setaria italica*) flour—leaving the

> The hill people are so independent. . .that no temptation of wages will induce them to engage . . . as coolies, and they are only prevailed upon to work from a conviction that, refusing to do so, Government might make some just demands against them for increase of rent [land revenue]. . . .[4]

By the 1840s there were many Badaga families earning a certain amount during a few months of each year from townspeople, from plantations and perhaps from the new Mission (Ouchterlony, 1848, 64; Shortt & Ouchterlony, 1868, 64). Their economy was now monetized, though the majority of families were still dependent on farming for their food requirements.

EXPANSION OF THE MARKET ECONOMY (1850–1900)

During the second half of the nineteenth century far-reaching economic changes triggered by the British settlers introduced the concept of competition and the importance of valuation to the Badagas. There is little indication of any competitiveness in their indigenous exchange activities or bartering practices before about 1840.

The opening of coffee (1838) and tea (1846) plantations on the plateau called for a great deal of manual labour; and by the 1850s many Badaga men found themselves competing for the first time with immigrants in a labour market.[5] Each group constituted one-half of the work force (Grigg, 1880, 399), but the British estate owners now preferred Badaga workers to immigrants because of their diligence. The labourers were paid in cash, not grain.

Secondly, the sizeable European population on the hills was now requiring quantities of cabbage, carrot, potato and other European vegetables which some Badaga farmers were able to supply. Their tradition of intensive farming in small fields was readily adapted to the new crops (Shortt & Ouchterlony, 1868, 35); and their venture was helped by a climate not unlike that of northwestern Europe (an English poet later was to muse on 'the sweet, half-English Neilgherry air').

During the latter half of the century a wide variety of indigenous farm products also found their way into the local market.[6] These foodstuffs were local varieties of wheat and barley, Italian, finger and slender millet, prince's feather (or amaranth), mustard seed,

reduce its tensions and achieve something like a 'steady state' based on a cash-crop economy and the institutionalization of certain social divisions which were the major cleavages during the time of troubles in the latter half of the nineteenth century.

NOTES

1. More recently one Badaga was converted to Islam and was being trained to proselytize that faith on the Nilgiris; B.E.M.S., 1901, no. 62, 96.
2. Thus two days after the first Badaga conversion, the missionary wrote: 'I went with Abraham into the coffee plantation yesterday in order to present him to his master as a Christian and to ensure his work as a plantation supervisor there'; trans. from Mörike, 1858, 93. Basel Mission (1905) contains full details of the frequent loans, made against pledges of land.
3. Grigg, 1880, 421–422; B.E.M.S., 1900, no. 61, 104. The old mission house, still in use, was built by Lord Elphinstone for his residence in 1840; Grigg, 1880, 458; Maclean, 1893, 403; Francis, 1908, 331.
4. Metz, 1864, 55, reflected: 'Challenged to perform a similar miracle . . . I replied that a much greater wonder than that, was, that I should not cease to love such squalid fellows as they were; and that too, in spite of all the abuse they daily heaped upon me'; compare B.E.M.S., 1849, no. 9, 45; 1853, no. 13, 39.
5. B.E.M.S., 1849, no. 9, 44; 1863, no. 23, 50–51; Metz, 1864, 8–9, 56; Grigg, 1880, 424–425; Stokes, 1882, 177; B.E.M.S., 1887, no. 48, 98. By 1864 boys could earn three to five rupees monthly on coffee plantations; this, and the usual parents' contention that 'they have become old without knowing [how] to read or to write and could do their work as well as their forefathers', explain the initial unpopularity of schools; Metz, 1864, 9, note; compare Grigg, 1880, 425.
6. Ke:ti was by no means the first Badaga village with a school. One had been established at De:na:qu in 1820 or 1821 and another at Ku:kalu around 1830; Ward, 1821, lxx; Harkness, 1832, 69–70; Hayavadana Rao, 1908, 113.
7. Eppler, 1900, 306–307; in these years there were respectively 69, 497 and 967 students. See B.E.M.S., 1886, no. 47, 88; 1887, no. 48, 98. In 1904–1905 there were 39 Badaga schools with 1202 pupils; Thurston, 1909, vol. I, 64.
8. The epidemic of 1863 was attributed to Jesus, 'because the missionary had but lately been preaching that not a hair, not a bird, can fall to the ground without his [Jesus'] express will and his sovereign command'; Rechs, 1891, 238.
9. B.E.M.S., 1877, no. 38, 15. At this same period, the Revd. Stokes claimed that most of the converts 'embraced the Christian religion from conviction and not from unworthy motives, as is very often the case in the plains where large numbers are gathered in'; B.E.M.S., 1873, no. 34, 32, and Grigg, 1880, 422.
10. B.E.M.S., 1900, no. 61, 110; such a shift in attitudes was not confined to one village.
11. B.E.M.S., 1883, no. 44, 80. It must be remembered the Badagas were then rather ignorant of Hindu scriptures; B.E.M.S., 1867, no. 28, 73.

241 has greatly improved, it is worth noting, because the state government has made loans available on relatively easy terms for the purpose of having field terraces constructed.

Because of terracing in many places, and widespread subdivision, fields are often so small that it would be markedly inefficient to plow them at any time (418) (Rangs 1934: 12-13; Vivekanandam Pillai 1937: 249). For the past 25 years, therefore, the plow and oxen have ceased to be used in the Nilgiri Hills. Much of the (465) work-load formerly carried by oxen is now taken by the spades of cheap migrant laborers from the plains: men work for daily wages of Rs. 1.75, equivalent to about 35¢ U.S., and women for about 30¢.

While the profits from potato, tea and coffee are very much higher per 426 acre than those from the traditional grain crops, the risks are also much higher. 474 Not only does a farmer need ready cash to buy seed or cuttings, fertilizer and labor, but he may need cash to feed his family if disease ruins the crop for one (651) season. Here the cooperative societies set up by the state government have helped the Badagas greatly. Both short- and long-term loans are available, against land or house securities, for all members of the societies (Vivekanandam Pillai 1937: 249). The societies have thus gone far in protecting Badagas from the high interest-rates of private money-lenders; some societies even help farmers by supplying seeds, fertilizers, and modern implements at cost prices.

Marketing

Traditionally the Badagas, Kotas and Todas occupied a very peripheral 175 position in a market economy: before the British reached the Nilgiris annual trading 437 expeditions to the market at Gundlupet, in Mysore, or to Erramadai, were the (439) source for the few requirements not otherwise available in the Hills. Such

142 field has been their profession for many generations. Mr. Grigg
[147] says "This may account for their extreme thinness; one meets with very few who can be called stout."

562 Among the Badagas the position of the women is somewhat
462 different from what it is among most peoples. Every Badaga has a few acres to cultivate but he does not mainly occupy himself with them, for his wife does all the outdoor farm work, while he is engaged
562 otherwise in earning something in hard cash. To a Badaga therefore his wife is his capital. Her labour in the field is
465 considered to be worth one rupee per day, while an average male Badaga earns merely three annas, or only a fifth part of what *his wife really earns as her wages, or is calculated to earn.* A Badaga woman who has not her own acres to cultivate finds work
562 on some other lands. She thus works hard for her husband and
461 her family and is quite content with the coarsest food—the *Korali (Panicum Italicum)* flour—leaving the better food to the male
142 members of the family. This fact, and the hard work the Badaga women have to perform, may perhaps account to some extent for the slight build of the Badagas as a race. The male Badaga too
461 works in the field, or at his own craft if he is not a cultivator, but
462 his love for ready cash is always so great that even if he had a
562 harvest to gather the next morning, he would run away as a cooly for two annas wages.

181 Having very few wants beyond a few cloths for their dress and a few copper or brass utensils, and accustomed always to frugal habits in their diet and other things, the Badagas are now the most thriving race of all the inhabitants of the Nilagiri District.
142 Their poor dress in a cold climate, their enormous industry,
461 and their continued exposure account for their thinness. It is interesting to notice that as a rule one never sees a stout Badaga or a lean Tôda. The majority of the latter are sunk in idleness. Nothing would be more welcome to a Tôda than to sit facing the sun from morning to evening, with a thick dirty cloth thrown over him, while the Badagas on the other hand are extremely industrious.

342 Though thus poor in his dress and household utensils a Badaga always takes care to have a comfortable and convenient house. It is always a snug house with neat rooms, and all the houses are built on such a uniform pattern that no difference of any kind can be noticed between any two houses; they coincide as exactly as the nests built by the same kind of birds. The first portion, at the entrance, is a small hall, called *Edirmani*,—front house. The
